PROFESSIONAL SUMMARY

Aspiring Data Scientist with strong expertise in Machine Learning, Deep Learning, Statistical Analysis, and Generative AI. Experienced in developing end-to-end AI solutions including recommendation systems, retrieval-augmented generation (RAG), predictive analytics, and NLP applications. Proficient in Python, SQL, FastAPI, and cloud-based data solutions. Passionate about solving real-world problems through data-driven decision making.

TECHNICAL SKILLS

Programming: Python, SQL, R, Java

Machine Learning: Scikit-learn, XGBoost, Random Forest, Gradient Boosting, TensorFlow, PyTorch

Generative AI: LangChain, LangGraph, OpenAI APIs, Gemini API, RAG, Vector Databases, Prompt Engineering

Data Analysis: Pandas, NumPy, Matplotlib, Power BI, Excel

Databases: PostgreSQL, MySQL, MongoDB, ChromaDB, pgvector

Backend: FastAPI, Flask, REST APIs

Cloud & Tools: Docker, Git, GitHub, Linux, VS Code

PROJECTS

AI-Powered Intelligent Job Search & Career Recommendation System

- Built an AI-driven recruitment platform using FastAPI and PostgreSQL.
- Developed resume parsing pipeline using LLMs and structured candidate profiling.
- Implemented semantic job matching using BM25 and vector embeddings.
- Designed multi-stage ranking pipeline combining rule-based scoring and LLM evaluation.
- Integrated Crawl4AI for automated job extraction from career websites.

Technologies: Python, FastAPI, PostgreSQL, ChromaDB, LangChain, Crawl4AI

Retail Sales Forecasting using Machine Learning

- Built predictive models for grocery inventory optimization.
- Performed exploratory data analysis on sales datasets.
- Implemented demand forecasting using XGBoost.
- Reduced inventory wastage through demand prediction.

Technologies: Python, Pandas, Scikit-learn, XGBoost, Matplotlib

Customer Segmentation using Machine Learning

- Applied K-Means clustering for customer segmentation.
- Engineered customer features from transaction data.
- Generated business insights to improve targeted marketing.

Technologies: Python, Scikit-learn, SQL

EXPERIENCE

Data Science Intern (*or Internship*)

- Cleaned and analyzed structured datasets.
- Built machine learning models for predictive analytics.
- Created interactive dashboards and reports.
- Collaborated with development teams to deploy AI solutions.
